

**Object: Declaration on application of REACH regulation (EC regulation 1907/2006 and amendments)
- updated SVHC substances list (EC Regulation of 06/13/2017 N ° 2017/999, annex XIV) and
Candidate List dated 17/01/2023**

CPE Italia SpA, with its registered office in Milano (Italy) Via D. Chiasserini at No. 15, as manufacturer and distributor, diligently requires suppliers to update purchased substances according to the final use.

Suppliers' awareness has been improved with proper survey on their position in respect to the REACH regulation to help them in their path to full compliance.

Information apply to substances listed on the ECHA website as of today.

European legislation does not mention any obligation for manufacturers like CPE Italia SpA to provide safety data sheets, otherwise required to chemical manufacturers.

At the same time manufacturers like CPE Italia SpA are requested to inform end users about presence of "substances with very high concern".

CPE Italia SpA,

DECLARES

- that in the articles produced and distributed are not intentionally used/added, as constituents or adjuvants, the substances listed as SVHC (Substance of Very High Concern) listed in the Candidate List (Annex XIV, EC Regulation 2017/999 of 13/06/2017).
- to adopt and implement (EC) REACH 1907/2006/CE Regulation updated by EC Regulation No. 2017/999 of 13/06/2017, as well as the Candidate List of 17/01/2023, within internal production processes, according to methods established by the Regulation (EC).
- two cases of exception properly monitored:
 - Unchangeable specific customer design
 - Resale article within unchangeable customer's qualified part listUpon customer's demand or openness, CPE Italy SpA is open and willing to investigate and suggest potential compliant alternatives.

General user information for Cadmium “Cd” electroplated parts

CONTACT	
Cd is not easily absorbed by human skin No threshold available	Unknown risk. Risk assessment suggested when frequently used. Gloves are recommended for manual handling. In case of exposed hands, wash with soap is recommended.
INGESTION	
Direct / indirect No threshold available	Direct: do not put parts in contact with mouth; parts are intended for professional use, only, and no other use other their application is expected. Indirect: do not put in contact with mouth anything used for parts’ handling.
INHALATION	
Vapor or dust	It is commonly recommended to: <ul style="list-style-type: none"> - Do not overheat parts (e.g. welding, ...) - Prevent parts from impacts and falls - Do not generate dust from parts (e.g. machinaries, abrasions, ...)
<p>OELV (Occupational Exposure Limit Values): risk assessment is recommended according to geography, environment, parts’ application, specially in case of frequent or daily use.</p>	

General user information for Nickel “Ni” electroplated parts

CONTACT	
Ni could be absorbed by human skin No threshold available	Risk assessment suggested in case of prolonged and/or frequent contact with skin. Gloves are recommended for manual handling. In case of exposed hands, wash with soap is recommended.
INGESTION	
Direct / indirect No threshold available	Direct: do not put parts in contact with mouth; parts are intended for professional use, only, and no other use other their application is expected. Indirect: do not put in contact with mouth anything used for parts’ handling.
INHALATION	
Vapor or dust	It is commonly recommended to: <ul style="list-style-type: none"> - Do not overheat parts (e.g. welding, ...) - Do not generate dust from parts (e.g. machinaries, abrasions, ...)
<p>OELV (Occupational Exposure Limit Values): risk assessment is recommended according to geography, environment, parts’ application, specially in case of frequent or daily use.</p>
